ECVN Diploma Examination 2018 – preliminary information

Candidates can meet at 8.30am on Tuesday 23rd October 2018 at the Reception of the Eurogarden Hotel where they will meet an appointed person who will walk with them to the Faculty and show where the candidate's room and the examination rooms are located.

The Examination Committee members will meet the candidates and introduce themselves at 9.00 am on Tuesday 23rd October 2018 in the candidate's room. The chairperson of the Examination Committee will provide all the information regarding the logistic and procedural details of the exam and will answer questions from the candidates.

OBJ

The written parts of the examination, except the MCQs, (parts 1-5) will be in the computer room of the faculty on the ground floor. The MCQs part will take place in a larger lecture room (Aula Messieri).

Candidates sitting only part/s of the examination can come to the Veterinary School at the relevant time, as outlined in the examination schedule below. These candidates are strongly recommended to inform the Examination Committee on the date and hour of their arrival in order to facilitate their welcome.

ECVN Diploma Examination Timetable

The exam will take place over two days for all candidates taking the exam

Day 1: Tuesday 23rd of October 2018

General introduction 09:00-09.30

Short answer questions 09.30-12.30

Videos 13.30-15.00

Neuropathology 15.30-17.00

17.00 Intro to DICOM viewer

Day 2: Wednesday 24th of October 2018

Neuroimaging 9.00-10.30

Electrophysiology 11.00-12.30

MCQ 13.30-15.30

For further logistic information please contact:

Short answer questions

This will last 3 hours for 18 questions. Neuro-anatomy (embryology, applied and structural neuroanatomy), neurophysiology, neuropharmacology and different aspect of clinical neurology (including treatment and diseases) will be examined in this section. Question format may comprise: extended match questions (EMQ), tabulated answers, complete the sentence, true/false, and short answer.

MCQ

This will last 120 minutes and consists of 75 questions. Candidates will be asked to select the best answer for a question from four or five options. . Each question will represent 1.33% of the total mark of this section. All areas of neurology and neuroscience may be examined in this section.

Neuro-imaging

This will last 90 minutes and consists of six (6) clinical cases and four (4) theoretical questions. The six cases will be presented with a DICOM viewer (Onis viewer 2.5) on the computer (<http://www.onis-viewer.com>). It will examine the candidates' abilities to recognize, describe and interpret lesions (anatomical level, orientation, type of imaging modality used, lesion characteristics), list special anatomical landmarks and to form a differential diagnostic list and main diagnosis. Four theoretically based questions on imaging will also be included. Candidates are expected to know basic imaging features in small and large animals. Basic knowledge is defined as what is included in general diagnostic imaging textbooks and articles. Question format may comprise: EMQ, tabulated answers, complete the sentence, true/false, and short answer.

Neuropathology

This will last 90 minutes and consists of 10 clinical cases. Questions provide some background information on the case and use gross (macroscopic) and histopathological (microscopic) images. You may be asked to interpret images (describe pathological changes), outline the pathogenesis, state additional diagnostic tests, provide pathological/morphological and/or the aetiological possibilities. Question format may comprise: EMQ, tabulated answers, complete the sentence, true/false, and short answer.

Electrodiagnostics

This will last for 90 minutes and consist of three questions. It will examine the candidates' abilities to perform an electrodiagnostic exam, their knowledge of the underlying electrophysiological events that generate common waveforms, their interpretation of normal and abnormal waveforms and their ability to form differential diagnoses from these tests.

Video based practical questions

This will last 90 minutes and consists of several videos of clinical cases. The main emphasis is on lesion localization and assessing the most likely differential diagnosis or diagnoses. Question format may comprise: EMQ, tabulated answers, complete the sentence, true/false, and short answer.

Question formats in the sections short answer questions, neuropathology, neuroimaging, electrophysiology and video based practical questions:

- Extended matching questions (multiple choice but with more choices or more complex choices)
- Tabulated answers – complete tables with answers selected from a list, or candidate specified answers comprising just a few words
- Complete the sentence question: A sentence has a blank space(s) left in it, which the candidate adds their own answers.
- True/false questions

- Questions requiring a phrase or one or two sentences
- A simple diagram may be requested to supplement a descriptive answer
- Images may be used to support the question

LOGISTIC INFORMATION and MAP HOTEL

EUROGARDEN HOTEL: via dei Billi, 2/a, 40064 Ozzano Emilia (BO), Italy - +39 051 794511
