Candidates sitting only part/s of the examination can come to the Veterinary School at the relevant time, as outlined in the examination schedule below. These candidates are strongly recommended to inform the chair of the UK examination committee (Fabio Stabile) on the date and hour of their arrival in order to facilitate their welcome.

Logistic information for candidates at Nottingham:

The exam site on the Campus of Nottingham Veterinary School is 40 minutes' walk from local hotels in Kegworth, or there will be parking available on campus.

Entry on campus:

In order to get onto campus you should use the South entrance which is on Landcroft Lane. If you approach the barrier there is a button to press to speak with security. If you inform them you are going to the Vet School they will open the barrier. The vet school building is the first on the right

Parking:

Parking on campus is controlled by the University and you will need to collect a parking permit each day from the vet school reception. Finding spaces on campus can be difficult at busy times and car sharing from your accommodation is advised.

Entry into Vet School:

The main entry is just past the horsebox. There is a doorbell to the right of the door which you may need to press for entry.

**The exam room:**

To be confirmed.

Catering/lunch:

The student canteen on campus serves a selection of hot food daily from 12-1.30 and some salads. There is a small convenience store and coffee shop on campus within 50m of the Vet School, which also serves a limited selection of sandwiches and cakes.

The nearest alternative is Kegworth. The Butcher's in the centre of the village does good filled rolls or there is a small COOP supermarket.

Exam Format

Short answer questions

The examination is 3 hours and consists of 17 (20 mark) questions based around a theme. Neuroanatomy (embryology, applied and structural neuroanatomy), neurophysiology (including neuroanaesthesia), neuropharmacology and different aspect of clinical neurology (including treatment and diseases and clinical trials) of small and large animals will be examined in this section. Question format may comprise: extended matching questions (EMQ), tabulated answers, complete the sentence, true/false, and short answers.

MCQ

This will last 120 minutes and consists of 75 questions. Candidates will be asked to select the best answer for a question from four options. Each question will represent 1.33% of the total mark of this section. All areas of neurology and neuroscience may be examined in this section.

Case-based questions

There will be two x 3 hour papers each consisting of 5 cases (20 marks). These will amalgamate previous parts of the exam and will include videos, gross pathology and histopathology, different imaging modalities and electrodiagnostic studies centered around an individual case. Not all aspects will be included in each case. This will also focus on pathogenesis of disease and ability to choose appropriate diagnostic tests. It is important to note that this is **A NO RETURN EXAM** meaning that once an answer has been submitted you will not be able to change it.

Neuropathology

This will last 90 minutes and consists of ten (10 mark) clinical cases. Questions provide some background information on the case and use gross (macroscopic) and histopathological (microscopic) images of the central nervous system, peripheral nervous system and muscle tissue. You may be asked to interpret images (describe pathological changes), outline the pathogenesis, state additional diagnostic tests, provide pathological/morphological and/or the aetiological possibilities. Question format may comprise: EMQ, tabulated answers, complete the sentence, true/false, and short answer.
